

Name _____

How Does a Ladybug Move?

Open-Ended Response Answer Key

1. Ladybugs need walking to explore plants and flying to escape predators or travel long distances quickly.
2. Climbing helps ladybugs reach aphids hiding on leaves or high places.
3. (Example response) If I were a ladybug, I would quickly climb a plant to hide or fly away to escape a predator.
4. Efficient movement helps ladybugs find food, escape danger, and survive in their environment.
