

Name _____

How Scientists Use Satellites and Balloons to Study the Atmosphere

Open-Ended Response Answer Key

1. I would want the satellite to collect data about storms, so we can warn people in time.
2. Because each layer has a different job, and they all work together to affect weather and climate.
3. Studying the atmosphere helps scientists predict storms and warn people about disasters.
4. We would know much less about the sky, and weather forecasting would be harder and less accurate.
