

Name _____

The Life Cycle of a Koala

Short Answer Key

1. A newborn joey is blind, hairless, and very small, about the size of a jellybean.
2. Pap helps prepare the joey's stomach for digesting eucalyptus leaves.
3. The joey stays safe inside its mother's pouch.
4. Adult koalas face challenges like finding food and avoiding predators.
5. Protecting habitats ensures koalas have enough food and safety from threats.
