

Name _____

The Life Cycle of a Leopard

Open-Ended Response Answer Key

1. Staying with their mother helps cubs learn important survival skills like hunting and staying safe.
2. The life cycle helps leopards survive because they learn essential skills before becoming independent.
3. As leopards get older, they may struggle with finding food and defending territory.
4. Understanding the life cycle helps conservation efforts by ensuring leopards have safe habitats for every stage of life.
