

Name _____

The Life Cycle of a Llama

Open-Ended Response Answer Key

1. Staying close to the herd provides safety and helps young llamas learn social behaviors.
2. The mother nurses the cria, keeps it safe, and teaches it how to find food.
3. Taking care of a pet llama would involve providing food, water, and shelter, along with proper medical care.
4. A long gestation period ensures the baby llama is fully developed and ready for survival.
