

Name _____

Lionfish: What's for Dinner?

Short Answer Key

1. Lionfish have a carnivorous diet, meaning they eat other animals.
2. Lionfish eat small fish, shrimp, and crabs.
3. Lionfish use their fins to trap prey, making it hard for the prey to escape.
4. In new habitats, lionfish can eat too many small fish, which disrupts the ecosystem.
5. People are helping by catching and eating lionfish to reduce their population.
