

Name _____

Lionfish: Daily Life Under the Waves

Short Answer Key

1. Lionfish are most likely to hunt during twilight, in the early morning or late evening.
2. During the day, lionfish rest and hide in coral reefs or rocks.
3. Lionfish raise their spines as a warning to protect themselves from predators.
4. Lionfish use their wide fins to corner prey, making it hard for the prey to escape.
5. Lionfish live alone; they are solitary animals.
