

Name _____

Where Does a Monkey Live?

Short Answer Key

1. Most monkeys prefer tropical rainforests.
2. Rainforests provide tall trees for climbing and plenty of food, like fruits and insects.
3. Baboons spend most of their time on the ground in savannas and grasslands.
4. The golden snub-nosed monkey lives in cold, snowy forests.
5. Monkeys help spread seeds, which allows plants to grow and keeps ecosystems healthy.
