

Name _____

Where Do Leopards Live?

Open-Ended Response Answer Key

1. Protecting habitats helps ensure leopards have food and shelter, which keeps their population healthy.
2. Their rosette patterns help them blend in, and their strong legs help them climb trees.
3. People can protect leopards by conserving forests and educating others about poaching dangers.
4. Leopards can live in many places because they are adaptable and can eat many different types of prey.
