## Life on the Farm: A Day in the Boots of a Livestock Farmer

### Open-Ended Response Answer Key

1. Answers will vary but could include providing shelter, extra feed, and water, and monitoring animals closely during the storm.
2. Sustainable farming practices in livestock farming can include rotational grazing, reduced use of antibiotics, and implementing waste management systems to protect the environment.
3. Livestock farmers are crucial in providing meat, dairy, and other animal products to consumers by raising and caring for animals throughout the production process.
4. Livestock farmers can diversify income sources by offering agritourism activities, selling farm-related products (e.g., wool or honey), or participating in community-supported agriculture (CSA) programs.
