

Name _____

The Magnificent Leopard

Open-Ended Response Answer Key

1. It is important to protect leopards because they are part of the ecosystem and help control prey populations.
2. A leopard's strong legs and sharp claws help it climb trees, and its rosette-patterned coat helps it stay hidden.
3. To help leopards, I would support conservation groups and educate people about their importance.
4. Other animals with similar hunting skills include tigers and jaguars, which also use stealth to catch prey.
