

Name _____

Exploring the Marvelous World of the Internet

Short Answer Key

1. A web browser displays webpages, plays videos, and allows you to click on links to visit different websites.
2. Search engines like Google search the Internet to find websites that match your queries and provide you with relevant results.
3. Two cybersecurity tips are: using strong and unique passwords for your accounts and being cautious about sharing personal information online.
4. Wi-Fi is a wireless Internet connection commonly found at home, in coffee shops, airports, and schools.
5. The Internet is a massive network of connected computers and devices that lets us access information, communicate, and enjoy various online activities.
