

Name _____

Unveiling the Amazing Materials for 3D Printing

Multiple Choice Questions

1. Which material is known for being eco-friendly and easy to use in 3D printing?
 - a) Metal
 - b) Ceramics
 - c) PLA (Polylactic Acid)
 - d) Rubber

2. What type of materials are often used in aerospace and automotive industries for 3D printing?
 - a) Paper
 - b) Biodegradable materials
 - c) Metals
 - d) Rubber-like materials

3. Which material is commonly used for creating pottery and decorative objects using 3D printing?
 - a) Plastics
 - b) Graphene
 - c) Ceramics
 - d) Food

4. What type of material is suitable for making gaskets and seals using 3D printing?
 - a) Metal
 - b) Food
 - c) Rubber-like materials
 - d) Ceramics

5. What is an example of an edible material used in 3D printing?
 - a) Graphene
 - b) PLA (Polylactic Acid)
 - c) Chocolate
 - d) Aluminum
