

Name _____

Mastering Materials: A Day in the Life of a Materials Handler

Short Answer Key

1. Materials Handlers use physical strength to lift, carry, and move heavy materials and products.
2. Safety awareness is important to prevent accidents and injuries. Safety measures may include wearing protective gear and using equipment safely.
3. Teamwork is important for Materials Handlers because they often collaborate with colleagues to complete tasks efficiently.
4. During quality inspection, a Materials Handler might report a product defect if they find any damage or issues that could affect product quality or safety.
5. Equipment operated by Materials Handlers may include forklifts, pallet jacks, conveyor belts, and automated systems.
