

Name _____

Weather Wizards: How Do Meteorologists Predict the Weather?

Short Answer

1. Explain why meteorologists analyze weather maps and how it helps them predict the weather.
2. Describe the role of Doppler radar in tracking severe weather events.
3. What is the importance of historical weather data in making weather predictions?
4. How does human expertise complement the use of technology in meteorology?
5. Imagine you're a meteorologist. How would you communicate a weather forecast for a day with expected rain and thunderstorms?
