Name _____

Astronauts and the Wonders of Weightlessness: Exploring Microgravity in Space

Short Answer

1. How do astronauts adapt to the sensation of disorientation in microgravity?

2. Explain why objects don't fall to the ground in microgravity.

3. What challenges do astronauts face while eating and drinking in space, and how do they overcome them?

4. Why do astronauts sleep in sleeping bags attached to the walls or ceiling of the spacecraft in microgravity?

5. Provide an example of a scientific experiment that benefits from the unique conditions of microgravity.
