

Name _____

The Mighty Komodo Dragon

Open-Ended Response Answer Key

1. Komodo dragons are special because they are the largest living lizards, have venom, and can hunt large prey.
2. Komodo dragons keep their environment clean by eating dead animals, which prevents the spread of disease.
3. Baby Komodo dragons stay in trees to avoid being eaten by adult Komodo dragons and other predators.
4. Komodo dragons face challenges such as habitat loss, human activity, and a limited range where they can live.
