## Unveiling the Mysteries of Our Moon's Surface

### Short Answer

1. Describe the lunar geology and some of the prominent features found on the Moon's surface.
2. Explain how regolith formed on the Moon and its significance for lunar exploration.
3. Name two common rocks or minerals found on the Moon and provide a brief description of each.
4. Discuss the role impact craters play in understanding the Moon's history and the history of our solar system.
5. Imagine you are an astronaut on a mission to the Moon. What challenges might you face due to the Moon's unique surface composition?
