## Where Do Mosquitoes Live?

### Short Answer Key

1. Mosquitoes can't live in Antarctica because it is too cold and dry.
2. Mosquitoes like habitats such as forests and wetlands.
3. Mosquitoes survive winter by hibernating in tree holes, caves, or basements.
4. Mosquitoes need standing water to lay their eggs.
5. Mosquitoes are most common in Africa, Asia, and South America.
