

Name _____

Where Do Moths Call Home?

Open-Ended Response Answer Key

1. Moths adapt by using their colors to blend in, being active at night in hot areas, and finding shelter during the day.
2. Forests are a perfect habitat because they offer flowers for food, trees for shelter, and leaves for laying eggs.
3. Moths are not found in Antarctica because it is too cold and there is no food or shelter available.
4. A perfect moth habitat would include flowers for food, trees for shelter, and a warm climate to help them survive.
