

Name _____

How Moths Reproduce

Open-Ended Response Questions

1. Why do you think moths rely on pheromones instead of sounds or visual signals to find mates?
2. How is the moth's method of reproduction well-suited for its short lifespan?
3. If you were a moth, what would be the most important thing to consider when laying eggs? Why?
4. How do you think the large number of eggs a moth lays helps its species survive?
