## Moth Talk: How Moths Communicate

### Open-Ended Response Questions

1. Why is scent communication useful for moths at night?
2. How do moths protect themselves from predators through communication?
3. Which type of moth communication—scents, sounds, or visual displays—do you think is most interesting, and why?
4. If you could invent a new way for moths to communicate, what would it be and how would it help them?
