

Name _____

How Does a Rabbit Move?

Open-Ended Response Questions

1. Why do you think rabbits evolved to hop instead of walking or climbing like other animals?
2. How does the way rabbits move help them survive in their natural habitats?
3. Imagine a rabbit is being chased by a predator. Describe how its movement would help it escape.
4. Compare the way rabbits move to the movement of another animal, such as a squirrel or a deer. What are the similarities and differences?
