

Name _____

Nanny in Disguise

Short Answer Key

1. Jerry, as Geraldine, handled the chaos caused by Prudence's experiments and Percival's robots by trying to maintain order, round up rogue robots, and tolerate the quirks of the Richington family with a sense of humor.
2. Prudence was a budding scientist with a lab in the basement, and Percival was a young inventor who had turned the attic into a robot workshop. They were both brilliant but mischievous.
3. Mr. Richington had a peculiar obsession with collecting rubber ducks and insisted on discussing them at length during dinner, while Mrs. Richington had a pet parrot named Sir Squawks-a-Lot who loved to imitate embarrassing sounds. Their quirky behaviors added to the eccentric and chaotic atmosphere of the household, making Jerry's job as "Geraldine" both challenging and amusing.
4. When Jerry's true identity was revealed, the Richingtons laughed it off and decided to keep him as their nanny because they appreciated his dedication to their family, despite his initial deception. This reveals their character as a family that values genuine connections over appearances.
5. Jerry likely learned that unconventional families can be filled with love and laughter, even if they have quirky behaviors and interests. This experience might have shaped his outlook by teaching him the importance of embracing life's unexpected adventures.
