

Name _____

Could Small, Portable Nuclear Reactors Power Remote Areas or Disaster Zones?

Open-Ended Response Answer Key

1. They can bring power to places without electricity, help hospitals, and clean water systems
2. Moving fuel safely, preventing accidents, and making sure people are trained to use them
3. Answers will vary; an ideal answer would include a reason such as energy needs, safety concerns, or clean energy
4. They can power lights, medical equipment, and communication systems when normal power is out
