Unlocking the Secret of VPNs: Your Ticket to Online Privacy

Multiple Choice Questions

1. What is the main purpose of a VPN (Virtual Private Network)?
 - a) To make internet connections faster
 - b) To hide your online activities and protect your data
 - c) To increase the number of ads you see online

2. Why is using a VPN on public Wi-Fi networks a good practice?
 - a) Because it makes your device run faster
 - b) Because public Wi-Fi networks are often less secure, and a VPN adds a layer of protection
 - c) Because it allows you to access geo-restricted content

3. In which situation might you want to use a VPN to access geo-restricted content?
 - a) When you're at home on your secure network
 - b) When you're traveling and want to watch your favorite shows from back home
 - c) When you're at a public library

4. What does a VPN client do on your device?
 - a) Makes your device waterproof
 - b) Connects your device to a VPN server and encrypts your internet traffic
 - c) Deletes all your files

5. What does it mean when your internet traffic is encrypted by a VPN?
 - a) It makes your data travel faster
 - b) It scrambles your data into unreadable code for security
 - c) It allows websites to see your data clearly
