

Name _____

Soaring High: Crafting the Perfect Paper Airplane

Multiple Choice Questions

1. What is the first step in making a paper airplane?
 - A. Fold the paper in half diagonally.
 - B. Fold the paper in half lengthwise.
 - C. Create the tail of the airplane.
 - D. Shape the wings of the airplane.

2. What is the purpose of folding the top edges diagonally towards the center crease?
 - A. To form the tail of the airplane.
 - B. To create the wings of the airplane.
 - C. To make the airplane fly faster.
 - D. To make the airplane spin in the air.

3. What step helps with the stability of the paper airplane during flight?
 - A. Folding the top edges diagonally.
 - B. Forming the wings of the airplane.
 - C. Creating the tail of the airplane.
 - D. Shaping the wings of the airplane.

4. What should you adjust to ensure your paper airplane is balanced and symmetrical?
 - A. The number of folds.
 - B. The size of the paper.
 - C. The wingtips and tail.
 - D. The throwing angle.

5. How can you experiment with your paper airplane to improve its flight performance?
 - A. Adjust the size of the paper.
 - B. Fold it in half diagonally.
 - C. Change the color of the paper.
 - D. Experiment with different throwing angles and force.
