

Name _____

Unveiling the Anatomy of Non-Vascular Plants: Exploring Their Essential Parts and Functions

Multiple Choice Questions

1. What is the main body of a non-vascular plant called?
 - A) Sporophyte
 - B) Stem
 - C) Rhizome
 - D) Gametophyte

2. What is the function of rhizoids in non-vascular plants?
 - A) Photosynthesis
 - B) Water and nutrient absorption
 - C) Reproduction
 - D) Structural support

3. Which part of a non-vascular plant is responsible for producing spores?
 - A) Leaves
 - B) Rhizoids
 - C) Sporangia
 - D) Gametangia

4. What is the primary function of leaves in non-vascular plants?
 - A) Photosynthesis
 - B) Nutrient transport
 - C) Water absorption
 - D) Reproduction

5. How do non-vascular plants reproduce?
 - A) Through seeds
 - B) By fragmentation
 - C) Via spores
 - D) Through vegetative propagation
