Beware of the Phishermen: Safeguarding Against Phishing Attacks

Open-Ended Response Questions

1. Imagine you receive an urgent email claiming to be from your bank, asking you to click on a link and provide your account information. Describe the steps you would take to determine if it's a phishing attempt and how you would protect yourself.
2. Discuss the potential consequences of falling victim to a phishing attack. What kind of personal information could be at risk, and how might it be used by attackers?
3. Why is it crucial for individuals to educate themselves and their friends and family about phishing attacks? How can this knowledge help in preventing cybercrimes?
4. Share a personal experience or story related to phishing attacks or online scams. How did you handle the situation, and what lessons did you learn from it?
