

Name _____

The Adventures of a Physician Assistant: Healing and Helping

Short Answer Key

1. Aspiring Physician Assistants need a master's degree from an accredited PA program, typically taking 2-3 years after earning a bachelor's degree.
2. One skill that Physician Assistants should possess is "strong communication," which is important for effectively interacting with patients and the healthcare team.
3. During patient assessments, a Physician Assistant might take the patient's medical history, perform a physical examination, and order necessary tests.
4. Patient education is crucial to ensure that patients understand their conditions, treatment options, and medications, which empowers them to make informed decisions about their health.
5. Licensing and certification ensure that Physician Assistants meet the necessary educational and competency standards to provide safe and effective healthcare.
