

Name _____

Plate Tectonic Boundaries: Where Earth's Puzzle Pieces Meet

Short Answer

1. Describe the geological features created at divergent boundaries.
2. How do subduction zones form at convergent boundaries, and what geological phenomena are associated with them?
3. Explain the movement of tectonic plates at transform boundaries and the resulting geological events.
4. Differentiate between continental and oceanic crust and their behaviors at plate boundaries.
5. What role do plate boundaries play in shaping the Earth's surface over geological time?
