## Effective Strategies for Global Poverty Reduction

### Short Answer Key

1. Economic growth can lead to poverty reduction by creating job opportunities, increasing incomes, and improving overall living standards.
2. Education empowers individuals by equipping them with knowledge and skills that enhance their job prospects and ability to make informed decisions.
3. An example of a social safety net program is unemployment benefits, which provide financial support to individuals who have lost their jobs during economic downturns.
4. Gender equality and women's empowerment are crucial for breaking the cycle of poverty because they provide women with equal access to education, employment, and resources, enabling them to improve their economic and social status.
5. Pablo Picasso used his art to raise awareness about poverty and inequality by depicting the struggles of everyday people in his works, shedding light on societal challenges.
