Effective Strategies for Global Poverty Reduction

Open-Ended Response Answer Key

1. Promoting economic growth is significant for poverty reduction as it can lead to job creation, increased income, and improved living standards for individuals and communities in poverty. Economic growth can also generate resources for social programs and infrastructure development, further benefiting society.
2. Access to education has a long-term impact by empowering individuals to escape poverty through increased earning potential, improved health outcomes, and greater participation in civic life. Education can also lead to generational improvements, as educated parents often prioritize their children's education.
3. Social safety nets are vital in providing support to vulnerable populations during economic hardships, preventing them from falling deeper into poverty. These programs contribute to poverty reduction by ensuring that basic needs are met even during challenging times, promoting social stability and well-being.
4. Artists like Pablo Picasso play a crucial role in addressing poverty-related issues through their artwork. Art can serve as a powerful catalyst for social change and awareness by emotionally engaging viewers, sparking empathy, and encouraging dialogue and action. Picasso's work, which depicted the struggles of everyday people, raised awareness about societal challenges and inequalities, prompting discussions and advocacy for change.
