Diving into Clean Water: Water Privatization and Public-Private Partnerships

Open-Ended Response Questions

1. Imagine you live in a community where water has been privatized. How might your access to clean water change, and what concerns or benefits might arise?
2. Discuss why accountability is essential when it comes to managing public-private partnerships (PPPs) related to water services.
3. In your opinion, should access to clean water be a basic human right or a service that can be privatized for profit? Explain your reasoning.
4. Research and provide an example of a real-world situation where water privatization or a public-private partnership (PPP) had a significant impact on a community's access to clean water.
