## The Great Pyramid of Giza

### Open-Ended Questions Answer Key

1. The Great Pyramid is still standing because it was built with strong materials like limestone and granite, and its design was incredibly stable. The ancient builders were skilled in construction and placed the blocks tightly together to protect it from weather and time.
2. It's amazing that the pyramid was built without modern machines! The fact that ancient workers used simple tools, ramps, and teamwork to move huge stone blocks is incredible.
3. The pyramid shows that ancient Egyptians were highly advanced in engineering, math, and astronomy. It also highlights their beliefs in the afterlife and how much effort they put into honoring their leaders.
4. I would explore the hidden chambers to see if there are undiscovered treasures or writings that could tell us more about Pharaoh Khufu and ancient Egyptian culture. It would be exciting to learn new secrets about history!
