

Name _____

What Does a Raccoon Look Like?

Short Answer Key

1. A raccoon's tail is bushy and marked with black rings, usually five to seven.
2. Raccoons' paws are good at gripping, opening, and manipulating objects.
3. Raccoons' large and reflective eyes help them see well in low light, making them excellent nocturnal animals.
4. Raccoons in northern areas are larger to store more fat and survive colder climates.
5. Raccoons' ears help them detect faint sounds in their surroundings.
