## Where Does a Raccoon Live?

### Short Answer Key

1. Raccoons can be found in parts of Europe and Asia outside of North America.
2. Forests are good for raccoons because they have trees for shelter and water sources for food.
3. In cities, raccoons use places like chimneys, under porches, and abandoned buildings for shelter.
4. Raccoons grow thick fur and store extra fat to survive cold climates.
5. Being adaptable means raccoons can adjust to many different environments and find ways to survive.
