

Name _____

All About Raccoons

Short Answer Key

1. Raccoons are small mammals with gray or brown fur, a black mask over their eyes, and a bushy tail with rings.
2. The black mask helps reduce glare and improves the raccoon's night vision.
3. Being nocturnal means the animal is most active during the night.
4. Raccoons use their sense of touch to find and examine food, even in the dark.
5. Raccoons are good climbers because they have sharp claws that help them grip and climb trees.
