

Name _____

Ranchers: Guardians of the Great Outdoors

Short Answer Key

1. Ranchers might perform tasks such as assisting with calving, ensuring newborn calves are healthy, and providing any necessary medical care.
2. Ranchers ensure sustainable land care by practicing responsible grazing, minimizing soil erosion, and preserving natural vegetation and habitats.
3. Planning and record-keeping are crucial for tracking cattle health, breeding, and financial transactions, as well as for making informed decisions and future planning.
4. Resourcefulness allows ranchers to adapt to unexpected challenges by finding solutions to problems like equipment breakdowns, sudden illnesses, or extreme weather events.
5. Ranchers contribute to preserving natural habitats by implementing responsible land management practices that maintain ecosystems, protect wildlife, and minimize environmental impact.
