Name _____

Spread the Knowledge: Understanding Range, Variance, and Standard Deviation

Short Answer

1. What does the range measure, and how is it calculated?

2. Explain how variance is calculated and what it tells us about a dataset.

3. What does standard deviation measure, and how does it relate to variance?

4. Describe what a higher variance indicates about a dataset.

5. Can you provide an example of when understanding measures of spread would be useful?
