

Name _____

How Does a Rabbit Reproduce?

Short Answer Key

1. A female rabbit is called a doe, and a male rabbit is called a buck.
2. A litter usually has 4 to 12 kits.
3. Rabbits can reproduce throughout the year because they do not have specific mating seasons.
4. Kits are born blind and hairless.
5. A doe keeps her babies safe by spending little time near the nest to avoid attracting predators.
