## The Wonderful World of Reproductive Hormones

### Short Answer Key

1. Testosterone
2. Follicle-stimulating hormone (FSH)
3. Estrogen, progesterone, LH, and FSH
4. The menstrual cycle involves the monthly release of an egg from the ovaries, thickening of the uterine lining, and shedding of the uterine lining if pregnancy does not occur.
5. Understanding reproductive hormones is important because they play a vital role in sexual development, fertility, and reproduction, and help maintain overall reproductive health.
