

Name _____

Frogs at Rest - Short Answer Questions Answer Key

1. Frogs don't have eyelids that close completely, so their eyes stay open even when they rest.
2. A frog living near water might rest on rocks, logs, or at the edge of the water.
3. Hibernation is a deep resting state that frogs enter during colder months to survive when food is scarce.
4. Frogs blend into their surroundings by hiding in mud, leaves, or other places where predators can't easily see them.
5. Being cold-blooded means their body temperature depends on the temperature of their environment.
