

Name _____

What Does a Rhinoceros Look Like?

Open-Ended Response Answer Key

1. Without their horns, rhinos might struggle to defend themselves, dig for water, or access food.
2. Rhinos are compared to prehistoric animals because of their large size, thick skin, and unique horns that resemble ancient creatures.
3. A rhino's size helps scare off predators and allows it to push through dense vegetation.
4. A zoo environment for rhinos should include grassy areas, mud pits, water for drinking and bathing, and trees or bushes for shade and food.
