

Name _____

Daily Habits and Behaviors of Rhinoceroses

Short Answer Key

1. Crepuscular animals are active during twilight hours, such as early morning and late afternoon.
2. Mud baths help rhinos cool off, protect their skin from sunburn, and keep insects away.
3. White rhinos are more social and live in small groups, while black rhinos are solitary and territorial.
4. Rhinos communicate by scent marking and making sounds like grunts and growls.
5. Mother rhinos protect their calves to teach them survival skills and keep them safe from danger.
