

Name _____

How Does a Rhinoceros Communicate?

Short Answer Key

1. Rhinos make grunts, growls, snorts, and squeaks.
2. Rhinos use urine and dung to mark their territory or leave messages for other rhinos.
3. A calm rhino might graze slowly or rest in the shade.
4. Rhinos rub their horns against trees to show strength or dominance.
5. Understanding rhino communication helps scientists protect them by learning more about their needs and behaviors.
