

Name _____

The Rhinoceros

Short Answer Key

1. Rhinos are mammals because they are warm-blooded and their babies drink milk from their mothers.
2. Two species are the white rhino and the black rhino.
3. Rhinos protect themselves using their horns and their strong bodies.
4. Conservationists create wildlife reserves and study ways to grow horns without harming rhinos.
5. Poachers hunt rhinos for their horns, which some people think have special powers.
