

Name _____

The Rhinoceros

Open-Ended Response Answer Key

1. If rhinos disappeared, the balance of their ecosystems could change, as they help shape the land and spread seeds.
2. People can help stop poaching by supporting conservation groups, spreading awareness, and enforcing stricter laws.
3. Protecting endangered animals like the rhino helps maintain biodiversity and the health of ecosystems.
4. As a conservationist, I would create more protected areas, educate communities, and work on technology to stop poaching.
