

Name _____

A Day in the World of Robotics

Open-Ended Response Questions

1. Imagine you could design your own robot to help people. Describe your robot's appearance, abilities, and how it would make a positive impact on society.
2. If you could spend another day in the world of robotics, what new adventure or discovery would you want to explore? Explain your choice and why it interests you.
3. How do you think robotics and technology will shape our future? What are some exciting possibilities or potential challenges?
4. If you could be friends with one of the robots in the lab, which one would you choose and why? What activities would you do together?
