## Rosalind Franklin: Unveiling the Secrets of DNA

### Short Answer Key

1. Rosalind Franklin was born in London, England.
2. Rosalind Franklin used X-ray crystallography to study the structure of DNA.
3. Photograph 51 is significant because it provided crucial evidence for the double-helix structure of DNA.
4. James Watson and Francis Crick used Rosalind Franklin's data to propose the double-helix structure of DNA.
5. Answers may vary but could include reasons such as gender bias or the competitive nature of scientific research during her time.
